To whomsoever it may concern

I am writing this letter at the request of Dr. Jayaprakash Kar who is a faculty member at The LNM Institute of Information Technology, Jaipur, India.

Dr. Kar has been collaborating with me on my project on anomaly detection on wireless devices. We are applying protocols and primitives for constrained devices using elliptic curve and pairing based cryptography in random oracle and standard models. In 2017, I invited Dr. Kar as a Visiting Researcher, and the collaboration has led to many research articles in high quality international journals, namely, IEEE Systems Journal and IEEE Access.

It is my pleasure to collaborate with Dr. Kar.
