# Recommendations

---

- 1. Identify and Support Low Performers:** While the average score is decent, it is essential to provide additional support such as extra mock interviews, resume workshop for students who are consistently scoring below this average.
- 2. Focus on Top 1%ile Students:** The college should provide them with advanced interview training, and industry-specific preparation to maximize their potential and secure top-notch job offers.
- 3. Encourage quality projects:** The college should encourage students and relevant clubs to focus on building quality projects rather than just another website clone. Having in-depth technical and conceptual knowledge of their project is another major area college could focus on.
- 4. Enhance Data Science and Analytics Preparation:** While technical roles dominate the interviews, there is a growing demand for data science and analytics positions. It would be beneficial to provide additional resources and mock interview opportunities for students interested in these domains.
- 5. Diversify Mock Interviews for Business and Consulting Roles:** The college should consider collaborating with industry professionals to conduct events and more mock interviews for business and consulting roles.
- 6. Introduce System Design Mocks:** As the industry demand for system designers is growing, it would be beneficial to mandate system design mocks. This can help students prepare for complex technical interviews in these domains.
- 7. Strengthen Behavioral Interview Training:** College should ensure that students receive adequate training for behavioral interviews including practicing common behavioral questions and refining communication and interpersonal skills.
- 8. Balance Difficulty Levels:** While it's important to prepare students for hard interviews, it's equally crucial not to neglect the easy and medium difficulty levels. Ensure a well-rounded interview preparation program that covers all levels and gradually builds students' confidence and competence.
- 9. Feedback and Mentorship:** Ensure that students receive constructive feedback after each mock interview. Additionally, connecting students with industry mentors can provide valuable insights and guidance for their job search.
- 10. Raising Awareness on Importance of Mock Interviews:** To ensure that every student benefits from mock interviews, the college should encourage active participation. Incentives, recognition, or making mock interviews a mandatory part of the curriculum can help increase participation rates.
- 11. Industry Collaboration and Guest Lectures:** Inviting industry professionals for guest lectures, workshops, and interactive sessions can offer real-world insights to students. It also helps them understand the industry's expectations and keeps them updated on the latest industry trends and practices.
- 12. Strengthen CS Fundamentals and ML-DL/AI Concepts:** The scores in CS Fundamentals and ML-DL/AI Concepts are relatively lower. Same for Backend and Business Analyst skills. The college can arrange special classes, hands-on sessions, and projects to reinforce these concepts/ skills.

# Top 15 Performers

- Prajval Bhardwaj
- Dhruv Sanjeev Sharma
- Siddharth Mishra
- Vinamra Jain

# MOCK INTERVIEW AND MENTORSHIP

## 💡 Interview fact

48% of engineering students in India are unemployed.

~ [NITI Aayog Vice-Chairman Rajiv Kumar, 2022]

- Our mock interviews and mentorships aim at guiding final year and pre-final year students to ace in their respective job and internship interview.
- We primarily provide 7 types of mock interview which includes: **Coding, Data Science, Product Mangement, Design, Business Analyst, Consultancy and Behavioural.**
- These sessions are taken by experienced professionals working in top startups and MNCs.

# BENEFITS AFTER SESSION

Each Mock Interview/Mentorship: 60 minutes (Duration)  
Post session, students receive:

## Detailed feedback report

- 100+ feedback points analyzed over different parameters.
- Expert suggested personalized next steps.

## Certificate

- Showcases interview readiness.
- Certified by CS Mock in collaboration with the college.

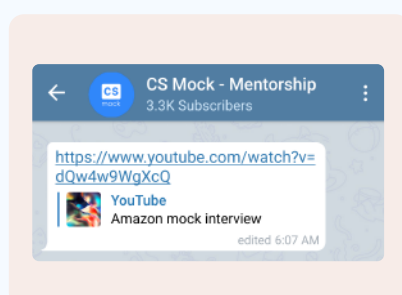

## Last minute resources

- Access to interview preparation notes for quick revision.

## Session recordings

- Revisit and analyze session performance.

## Access to mentorship community

- Constant support in your career path by CS Mock experts.
- Enrich learnings from other members.

# BENEFITS FOR PLACEMENT CELL

Collaborating with CS Mock, the placement cell will have:

Assured increase in placement statistics

Constant support to each student

Student's performance dashboard

Strengthen image via certificates

Referral by hiring experts

Improve college visibility among companies

## HOW DOES SESSION(S) WORK ?

Be interview ready with these 3 steps

Schedule your session

Attend your session

Receive deliverables

## FREQUENTLY ASKED QUESTIONS

**Q Do CS Mock also provide training or have any courses?**

Our services are purely assessment and guidance-based, but the expert's doubt-clearing sessions, detailed feedback reports, and resources we provide are equivalent to any training or course required for interview preparation.

**Q Are mock interviews and mentorship services available to all branch students?**

We offer mock interviews in coding, data science, product management, design, business analyst, consultancy, and behavioural, covering the various job profiles chosen by students. As a result, we cover engineering students from all disciplines who are willing to participate in internship/placement interviews.

**Q Our college already has a good placement record, so why do we need sessions by experts?**

Even if students are fully prepared, they will need guidance and practice to perform to their full potential. We get a lot of bookings from top Tier-1 colleges, including IITs, every week. A single session can even have a significant impact on college placement quality and student performance.

**Q Which colleges or places do CS Mock provide service assistance?**

We assist students at 12 IITs (IITR, IITK, IITD, and the other 9 IITs) and 60+ prestigious engineering colleges across India.

**CS Mock guarantees improved placement quality.**

# STUDENT REVIEWS

vmware®

“

## I got a secrete tip that got me a job

I took 2 mock interviews from CS Mock and it genuinely helped me a lot in brushing my basics and acknowledging my weak points. I got a tip that I need to keep interacting with the interviewer during the interview.

~ Vidhi Aggarwal (IIT Roorkee Batch 2022)

”

## I realized my areas of improvement

The feedback by the interviewer at the end of the session was sufficient enough for me to realize my areas of improvement after which I was able to crack a significant number of companies.

~ Arun Pandey (Gyan Ganga College of Technology)

“

## The interviewer was a pro

The whole process was very well structured and easy to follow. The interviewer was a pro and shared some gainful insights which helped me a lot. There was a person from the CS Mock team other than the interviewer during the entire session to bridge any problem.

~ Ananya Rawat (IIT Roorkee Batch 2022)

Microsoft

”

## Mock interview is worth buying

After the mock session with CS Mock I revised my concepts again carefully. I got selected with multiple companies like Oracle, Cisco, Societe Generale. Such a valuable session is indeed worth buying.

~ Vikas Aggarwal (IIT Roorkee Batch 2022)

SOCIETE GENERALE

# Interview Assessment Report

**Name: Sriraj Behera**

Difficulty Level: Medium

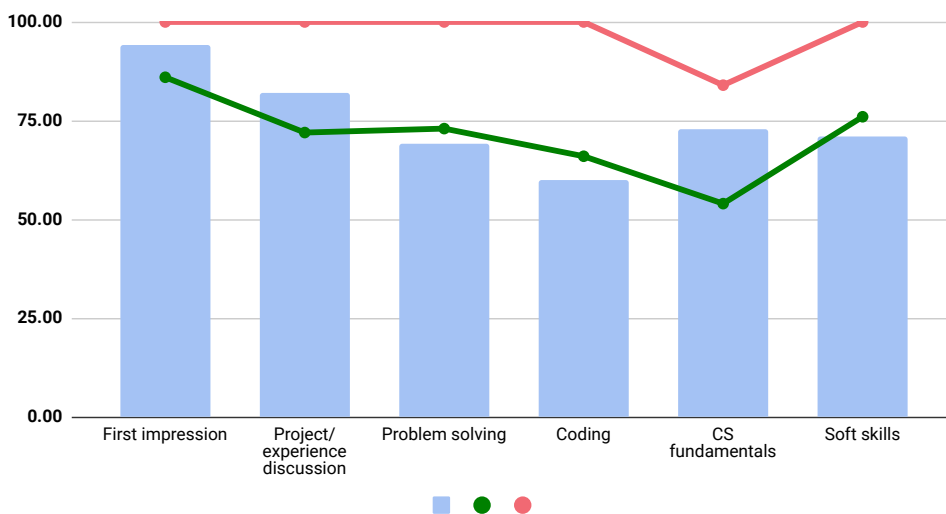

Mock Interview type: Technical

Assessment on: June 2023

Assessment id: GT/270523/00480

The recipient of this report is [behera.sriraj2911@gmail.com](mailto:behera.sriraj2911@gmail.com)

**71%**  
Sriraj's score

**71%**  
Average score

**98%**  
Top 10%ile score

**Your interview proficiency in**

CS fundamentals, Project/experience discussion

**Your improvement potential in**

Soft skills, Coding

**Adaptive as a developer :**

Quite adaptive for upcoming role(s). Good work. Conceptually, candidate was really good. Average soft skills.

**Company type suitable for :**

Good for the early stage startups. Having strong command over projects is a good sign.

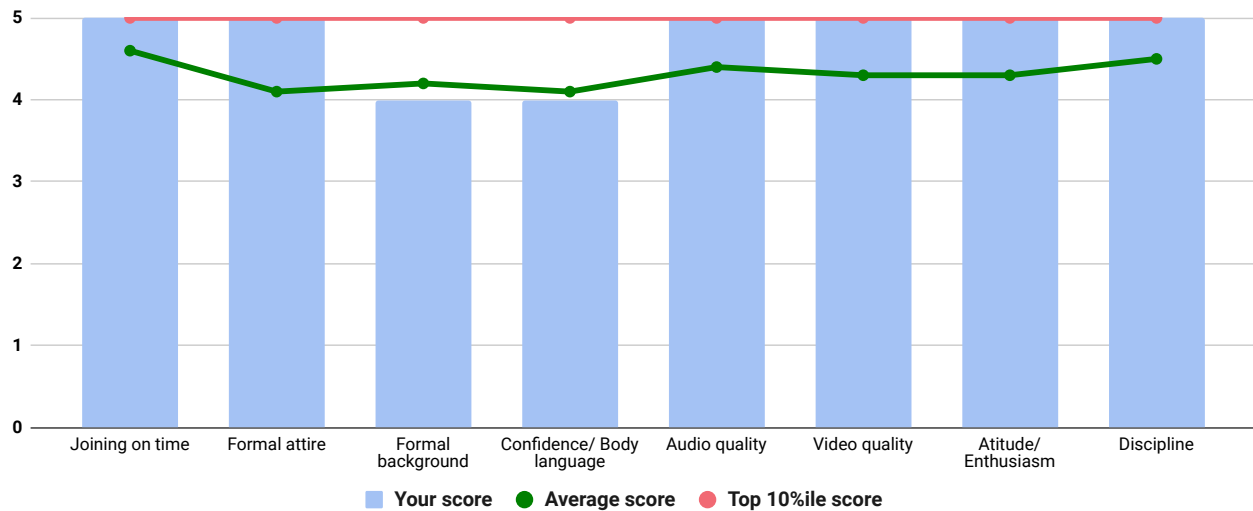

**CS Mock's expert suggestion for you regarding next step :**

- Sriraj, a good first impression makes a good start. You did well at it. Keep it up.
- Your good clarity of the projects done is a plus point. Refer resume analysis to learn more.
- Interviewer is looking for a potential problem solver in you. Hence, focus on solving diverse problems (1 ques of N types and not vice versa). Don't give more than 45min on any problem.
- Highly recommend you to try white board coding as during the interview you may have to code on white paper. Lookout for edge cases as well. Time check: 15-20min per problem.
- You've an edge over CS concepts so make the best use of it.
- Not being able to communicate your thoughts esp the solution is a big red flag. Enhance your soft skills. Do mirror talk more often than before. Mocks might help too.

Top 10%ile score (A+)

## Why first impression is important?

First impressions are infinitely important at an interview. In a study conducted by University of Toledo, Ohio, the decision that trained interviewers made in a 20-minute interview looking at job experience and skills was predicted by random observers looking only at the first 20 seconds of the interview.

## CS Mock's expert suggestion for you regarding next step

- Sriraj keep the same habit of joining 5-10 mins before the interview. It showcased your seriousness. Good.
- Professional attire is a must. Good to replicate the same in mock as well.
- Good that you helped the interviewer focus on you through formal/ plain background.
- Your confidence will play a major role in communication. Keep it up.
- Prefer a silent place. Keep electronic gadgets on silent mode. Use earphone. Test it beforehand.
- Clean the camera. Sit facing towards the light source. If needed, add an external light source.
- Your aptitude was quite good. Keep it up. It's like getting through half way already.
- Interviews are serious assessments. Maintain proper discipline throughout.

## SCORE ANALYSIS

## Self-introduction included

Full name, College/ Company name, Branch/ Job title, Internship/ project

## Project/ experience showcased

Self learning, Positive attitude, Creativity, Team Work, Critical thinking

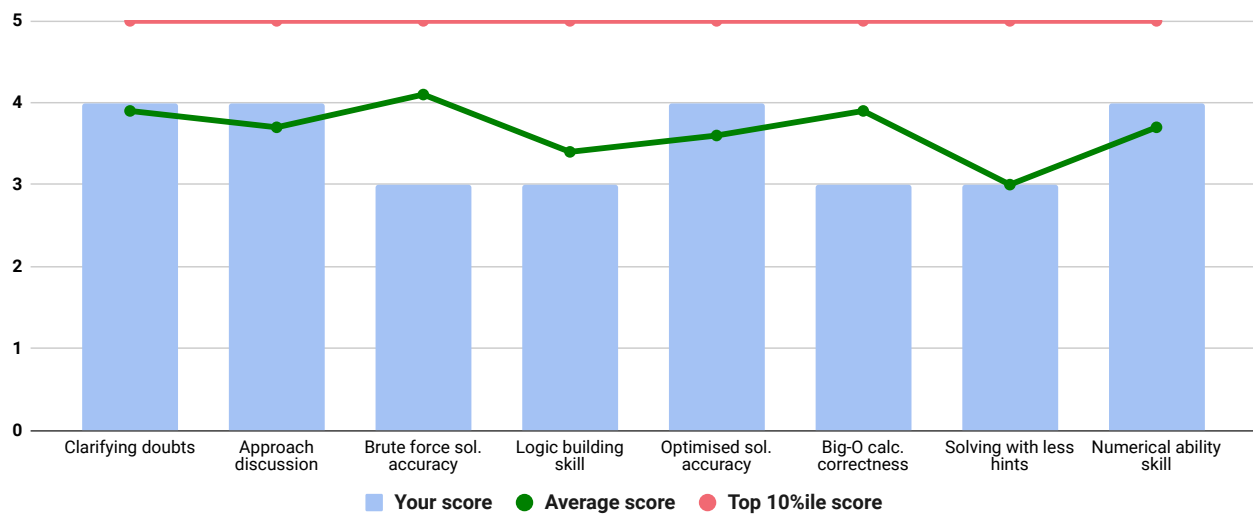

## Why project(s)/ experience(s) are important?

Employers may ask about projects you completed in the past to gain insights about your skills, management style or work ethics. They may use this to determine how well your skills match with the values and needs of the company.

## CS Mock's expert suggestion for you regarding next step

- Your crisp answers helped in dedicating enough time on important aspects. Good Sriraj.
- Your in-depth clarity about your work added confidence in you. Keep it up.
- You have a good grip over the possible follow-up questions, which is good. Hunt for more.
- Facing execution challenges are obvious but solving them effectively showcased your problem-solving skills.
- Clarity about the future improvements is a big plus point. Showcases your engineer perspective better.

## Data structure(s) and Algorithm(s) included

Array, Linked List, Sorting, Searching

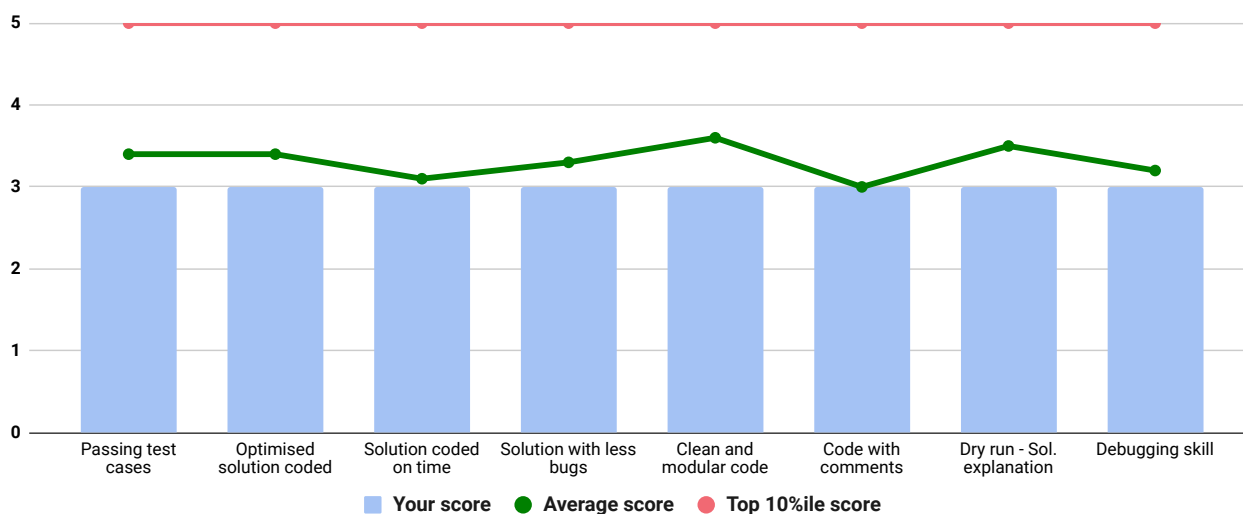

## Why good problem solving skill is important?

Solving problems is the core of computer science and goes hand-in-hand with software development. It's less about solving problems faster but more about coming up with the best solution.

## CS Mock's expert suggestion for you regarding next step

- Understanding the problem & doubt clarification in the beginning itself is a good practice. Good Sriraj
- Jumping to the solution without discussing the approaches results in sure shot rejections. Work on it.
- Brute force solution is a minimum requirement. For optimization, prefer time over space complexity.
- You've good logic building skills. Checkout the frequently asked problems on GfG / Leetcode.
- Solution optimization is a must-have skill. Practice solving diverse problems.
- An approach without Big O evaluation is just a thought. Practice for  $O(\log N, N, N \log N, N^2)$  at-least.
- It was a good thing that you neither asked for too many hints nor kept silent whenever got stuck. Keep it up.
- Go through Bit manipulation problems once. Also enhance your overall speed.

## Why good coding skill is important?

Learning code, in a broad sense, is like learning any language – or to be more accurate, a family of languages. 1/3rd of the top 25 jobs on Glassdoor are in coding or IT related. During competitive programming and technical interviews, a candidate with good problem solving skills but no coding skills is of no value.

## CS Mock's expert suggestion for you regarding next step

- Sriraj, coding with a happy flow is a must. Covering all the cases is equally important. Work on it.
- Practice more of white board coding (white paper and google docs). It helps you in putting down the thoughts effectively even without editor suggestions.
- Break down your code into modules. Then complete each module as much as the time permits.
- Fixing a buggy solution is tough. Make it easy by breaking down your solution into diff functions. Fix all the buggy functions as much as possible (in priority order of function's role).
- Improper code with weird name variable and lack of modularity is a sign of poor product building. Work on it.
- Adding relevant comment increases readability. Before wrapping up the interview, add 1 liner comment at functions/ important concepts.
- You need to learn how to dry run your code. Create a 2D matrix with number of columns as number of variables used and after each loop iteration, show how values are updated.
- If you're unable to debug your code, no one can do it for you. Break the code into modules & add relevant comments as and when needed. It helps.

## SCORE ANALYSIS

## CN topics included

Other

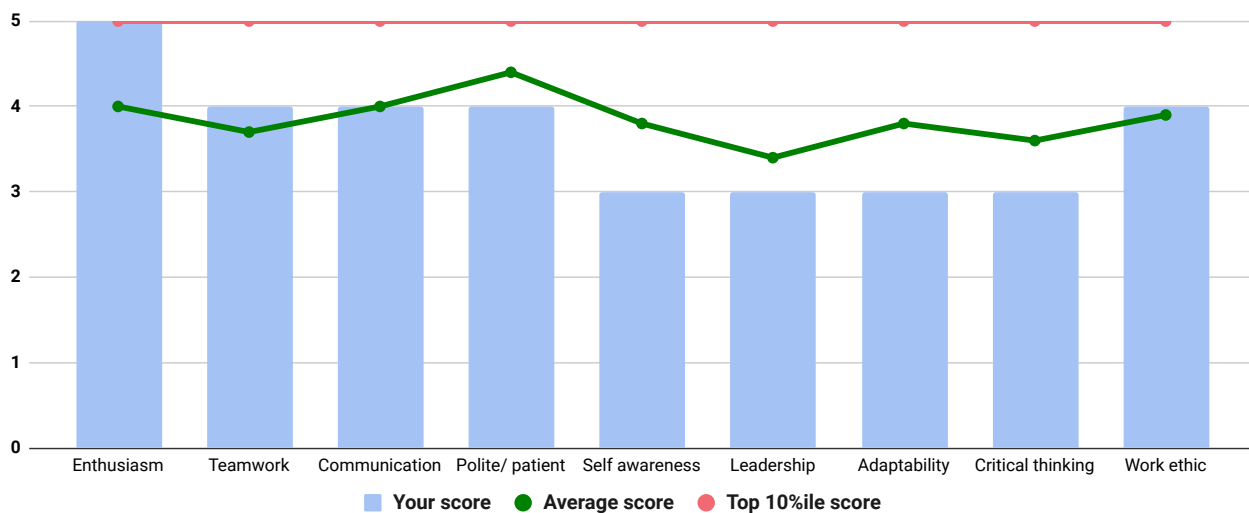

## Why CS concepts are important?

A programmer's aim might be to develop a website or application but while doing anything in the area of software development, one will establish an uninterrupted and efficient communication with computer to reach the final goal easily. Therefore one must be affluent with these topics of operating systems, database management and computer networks.

## CS Mock's expert suggestion for you regarding next step

- Sriraj, good that you prepared well for CS concepts. Focus on Database concepts majorly.
- Many candidates tend to skip OS and CN concepts. Good that you prepared it.
- OOPs concepts form the basic ones. Ignoring them may cost you , so it's suggested to read about both OOP & FP in detail.

## SCORE ANALYSIS

Top 10%ile score (A+)

## Why soft skills are important?

Recruiters do look for developed soft skills as much as knowledge and technical skills. Soft skills can help you communicate effectively with others, reduce conflicts, present ideas in group discussions and appear more confident.

## CS Mock's expert suggestion for you regarding next step

- Sriraj, your body language was good. It showcased your energy & enthusiasm as well.
- You've a teamwork spirit within you which is a good sign as projects are delivered by teams only. Keep it up.
- Communication is the most critical skill you can expect. Don't let it hamper your performance.
- Another proud badge you own is politeness and patience. Good work.
- Your lack of self-awareness can result in the interviewer's lack of trust in you. Avoid that.
- Major companies (like Amazon) actively look for leadership quality for a better culture fit.
- Through adaptability, the interviewer is actually checking your flexibility in various situations, be it skillset or in workspace. So work on it. Listen carefully to what the interviewer is saying.
- Critical thinking becomes important esp during technical problems. Solve more problems in limited time frame.
- Here, interviewer was evaluating you on a potential co-worker level & you showcased great work ethics. A good fit attribute for a new role.

## Message from interviewer's side

Student can improve the view of the problem solving to a much broader context. Would be good if the topics mentioned in resume would be of clear knowledge.

# Interview Assessment Report

**Name: Shubham Bansal**

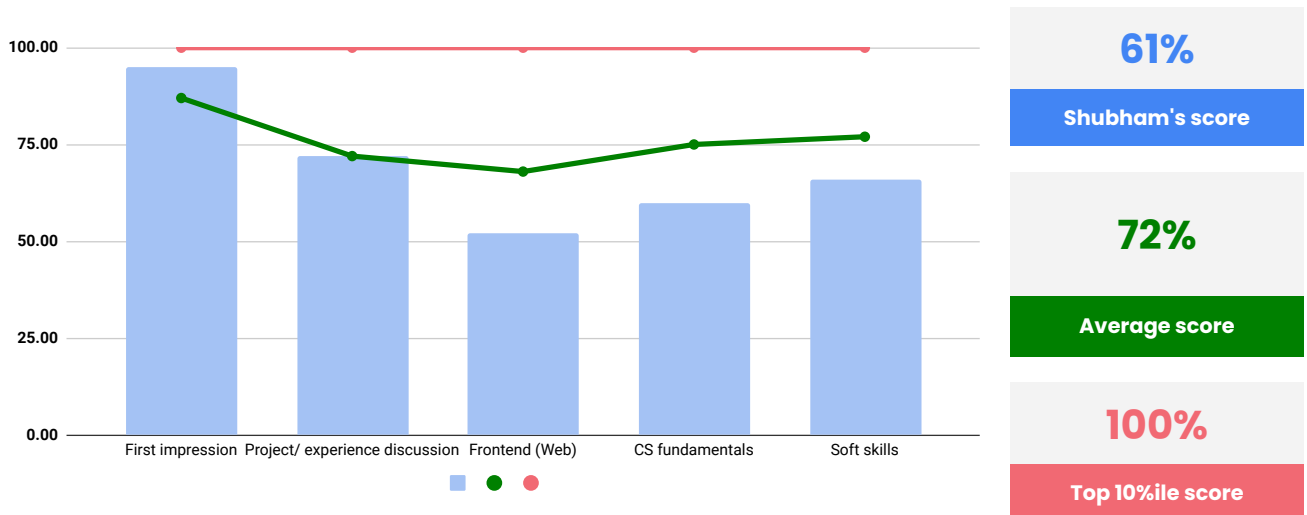

Difficulty Level: Medium

Mock Interview type: Frontend (Web)

Assessment on: June 2023

Assessment id: WD/250523/00002

The recipient of this report is shubhambansal096@gmail.com

### Your interview proficiency in

First impression, Project/ experience discussion

### Your improvement potential in

Frontend (Web), CS fundamentals

### Adaptive as a developer :

Somewhat adaptive for upcoming role(s). Need bit polishing. Conceptually, candidate was really good. Average soft skills.

### Company type or profile suitable for :

Good for the early stage startups. Solve more problems and enhance your project understanding if you are targeting product based firms.

### Next steps to be taken :

- Shubham, a good first impression makes a good start. You did well at it. Keep it up.
- Project discussion could mess up your entire interview. Understand the tech and followup questions properly.
- Interviewer is looking for co-worker who is good with frontend concepts esp good at JS as its the basis of web development. Hence, focus on understanding the concepts with relevant examples.
- You've an edge over CS concepts so make the best use of it.
- Not being able to communicate your thoughts esp the solution is a big red flag. Enhance your soft skills. Do mirror talk more often than before. Mocks might help too.

Finally, as front-ends, we are so used to making changes in our editor and then verifying the change in our browser. Often times during interviews, you won't have this luxury. When you're preparing for your interview, try code most of your layout without looking at the result till the end.

## Concept(s) included

HTML, Javascript, Testing/ debugging, Web performance

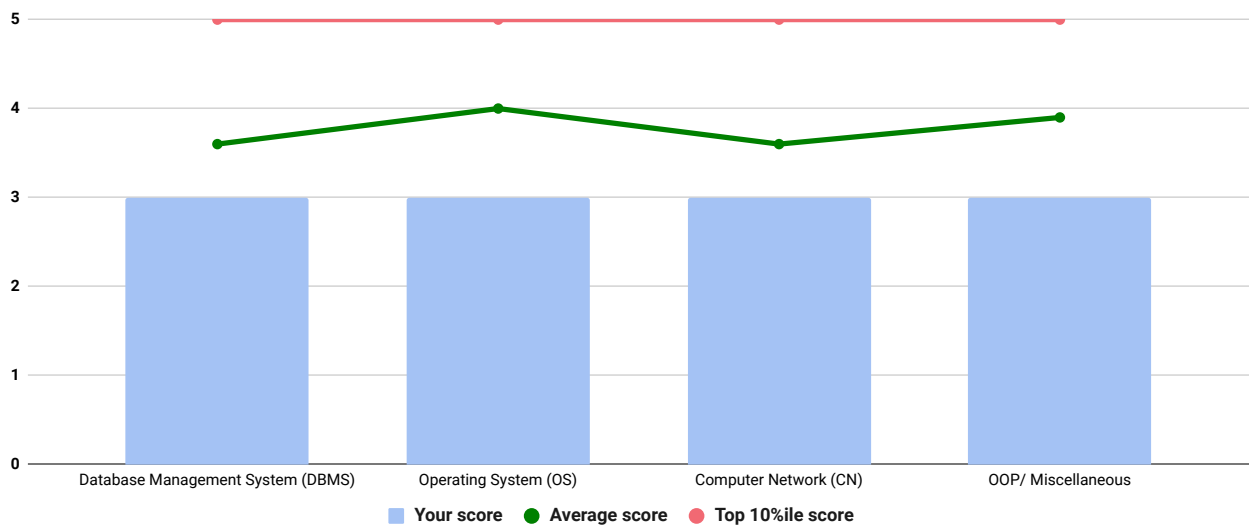

## Why frontend skill is important?

A successful business requires a functional, clean, and responsive website to appeal to clients. Front end development of a website is crucial to ensure effective interactive UI, security and performance optimisation.

## CS Mock's expert suggestion for you regarding next step

- Shubham don't directly proceed with the explanation without clearly understanding question asked by interviewer.
- The basic JS concepts are important irrespective of what JS framework/ libraries you work with. Do revise the basic concepts properly.
- Having depth knowledge about the Javascript and core frontend concepts are optional at fresher level. Depending upon time you can give it try.
- Candidates go through the concepts theoretically but miss the intuition behind. Work on it.
- Not being able to answer the follow-up questions esp around core tech stack could be problem. Work on it.
- Asking for hints when stuck makes sense but asking for too many would cost you. Take note.
- Work on your problem-solving skills. Solving JS or similar framework output based questions helps.
- If you're unable to debug your code, no one can do it for you. Break the code into modules & add relevant comments as and when needed. It helps.
- Presenting concepts in structured is a must. Good that you followed same.
- Logical reasoning is a crucial skill for any web developer. When presenting concepts, it is important to support it with logical arguments and examples. Also enhance your overall speed.
