An Online Training Session on Turnitin: Originality Check Plus

18th April 2023

Training focus on AI writing i.e How all the AI-matched literature is identified, in addition to fostering original thinking and interpretation of Similarity Report.

Number of Participants 35-40.

The LNMIIT community appreciates the tool and learns how to implement it in their research writing.

A few of the queries were also guided by the speaker.

Dr. Sheenu Jain 4:02 PM
Many time due to statistical data format eg chi square test.....it shows plagarism - What can be done i nthat case ?

What is the standard word setting practice - 4 words or 3 words ?

LNMIIT The LNM Institute of Information Technology

The LNMIIT Central Library Welcomes you to

An Online Training Session on **TURNITIN ORIGINALITY CHECK +**

Covering AI writing *(How all the AI-matched literature are identified.)* Fostering Original Thinking and Interpretation of Similarity Report

Tuesday 18th April 2023 3.30 pm

Mr. Akshay Prasanna
Senior Consultant, PES South Asia, Turnitin

Turnitin is a 'text-matching' software which is designed to provide confidence in the academic integrity of faculty, research scholars, and students work. Turnitin does this by comparing the submissions against an archive of Internet documents, Internet data, a repository of previously submitted papers, and subscription repository of periodicals, journals, and publications. Turnitin then creates an 'Originality Report' which can be viewed by faculty, research scholars and students, which identifies where the submitted text has matched another source.

Turnitin has been working hard on its AI writing (such as ChatGPT) detector. According to the creators, an AI writing indicator will be added to Turnitin's Similarity Report to show the likelihood that the document was AI-generated.
